[ISBN]:978-0-06-169714-2 [ISSN]:0-486-50040-0 [EAN]:9780199328790 [Number of Pages]:278 [Status:New - Published January 2017] Subject(s):Bacteriology Lecture Notes for the Determination of Cells of a Bacterium by the Gram Stain.....contains a full description of the preparation of organisms and of the Gram stain and four case reports. The first edition of this book was published in 1971. Since then, significant developments in the field have been made which have changed the method of staining and the interpretation of results from which much of the material in this edition has been drawn. The book deals with the Gram stain and the related techniques, the staining and the interpretation of results. It includes discussion of the staining of spores and the techniques used for staining with other substances. The book includes an account of the relevant anatomy of bacteria and cells, and examination of the causes of false positive and negative results. A good general introduction for students new to the subject, and a comprehensive and useful reference book for those already familiar with it. Leydig, Schatz, and Schomburg.Streptococci and Staphylococci. 6th edition. [ISBN]:978-1-78014-322-0 [ISSN]:0963-7110 [EAN]:978-1-78014-322-0 [Number of Pages]:444 [Status:New - Published July 2017] Lecture Notes for the Determination of Cells of a Bacterium by the Gram Stain.....contains a full description of the preparation of organisms and of the Gram stain and four case reports. The first edition of this book was published in 1975. Since then, significant developments in the field have been made which have changed the method of staining and the interpretation of results from which much of the material in this edition has been drawn. The book deals with the Gram stain and the related techniques, the staining and the interpretation of results. It includes discussion of the staining of spores and the techniques used for staining with other substances. The book includes an account of the relevant anatomy of bacteria and cells, and examination of the causes 82157476af
